Visa : Resident (Transferable)

SUMMARY

Experienced Full Stack Web Developer with strong expertise in building scalable web applications using Node.js, Express.js, MySQL, and MongoDB. Proficient in developing dynamic and responsive user interfaces with React, HTML, and JavaScript. Strong background in RESTful API development, database design, authentication, and performance optimization, committed to delivering efficient and secure systems. Skilled in web hosting, Linux server management, SSH deployments, domain configuration, SSL setup, subdomain management, and production server maintenance.

SKILLS & INTERESTS

Programming Languages JavaScript

Database Management SQL, MySQL, MongoDB

Soft Skills Problem-Solving, Time Management, Adaptability, Team Collaboration

Frontend Technologies HTML, React.js

Backend Technologies Node.js, Express.js

Deployment & DevOps Linux Server Management, Domain & DNS Configuration, Subdomain Setup, SSH Deployment, SSL Setup, Process Management (PM2), Reverse Proxy (Nginx)

Tools & Version Control Git

Interests Cricket, Continuous Learning, Skill Advancement

Languages English, Malayalam

EXPERIENCE

Full Stack Web Developer

FinGlider Solutions LLP

Jan '25 — Present

Bangalore, India

- Restaurant Management System:
 - Developed a full-stack web application with Client, Admin, and Waiter interfaces
 - Enabled dine-in, online ordering, QR-based ordering, takeaway management, and delivery operations
 - Implemented customer feedback capture and order tracking features
 - Developed a dedicated takeaway screen for efficient order processing
 - Built secure RESTful APIs and optimized database workflows for scalability and performance
 - Implemented table management (visual layout), reservations, and digital ordering (KOT) with live billing
 - Designed role-based access control (RBAC) for secure multi-user access
 - Developed product and category management with Excel bulk upload functionality
 - Implemented time-based menu display and QR code generation
 - Configured multi-tenant architecture (AMC, regions, multi-language support)
 - Implemented internationalization (i18n) supporting multiple languages (e.g., English, Arabic) with dynamic language switching and full RTL/LTR layout adaptation
 - Tech Stack: React.js, Node.js, Express.js, MongoDB
- Supermarket Management System:
 - Contributed to the development of a scalable supermarket management system with efficient inventory and stock control
 - Implemented batch-wise product management to track stock levels and expiry details
 - Developed dynamic product detail pages in the client UI displaying multiple product images and variants
 - Integrated image zoom functionality for enhanced product visualization
 - Built scalable backend logic and optimized database queries for improved performance
 - Implemented two-way feedback capture system via online orders and admin-triggered email forms with validation

- Developed admin interface to send feedback forms to customers via email
- Integrated order tracking system by sending tracking links to users upon order acceptance
- Tech Stack: React.js, Node.js, Express.js, MongoDB
- Learning Management System (LMS):
 - Developed a multi-role LMS with Admin, Instructor, and Student dashboards
 - Implemented quiz participation system with post-submission redirection to result page displaying answers and correct responses
 - Built secure RESTful APIs for course, user, and quiz management
 - Designed comprehensive course management including courses, syllabus, study materials, and course-based quizzes
 - Enabled Admin and Instructor to create quizzes and review student answers with correct answer comparison
 - Supported multiple students per mobile number with proper data handling
 - Implemented role-based access control (RBAC) for secure multi-user access
 - Designed responsive UI for seamless experience across devices
 - Tech Stack: JavaScript, Node.js, Express.js, MySQL
- Hosted and deployed production web applications on Linux servers using SSH, PM2, and Nginx. Managed domains, DNS, subdomains, SSL certificates, and server-side configurations.

Web Developer Intern
FinGlider Solutions LLP

May '24 — Dec '24
Bangalore, India

- Developed and maintained backend services using Node.js and Express.js
- Designed and implemented RESTful APIs for efficient data handling and system integration
- Designed and managed MySQL databases, including schema design and query optimization
- Built and integrated responsive frontend components using HTML, CSS, and JavaScript
- Contributed to the development of a Learning Management System (LMS), implementing backend APIs, database design, and frontend features
- Used Git for version control to ensure efficient code management and team collaboration
- Developed scalable and maintainable features across both frontend and backend layers
